

SPECIAL RESIDENTIAL ELECTRIC DUAL FUEL SPACE HEATING SERVICE Rate 53

AVAILABILITY:

In all communities served for single-phase residential electric service customers who operate Company approved interruptible electric space heating equipment so arranged to allow remote operation by the Company. The customer's primary source of space heating shall be the electric portion of a dual fuel heating system. The customer shall be responsible for providing a secondary source of space heating. Customers taking dual fuel space heating service under this rate will also be eligible to receive controlled electric water heating service hereunder. Heat pumps will not be served under this rate. Heat pumps will be provided electric service under the applicable firm service rate. The supplemental heating system portion of a heat pump heating system may be served under this rate. The customer must also receive electric service from the Company under another rate.

TYPE OF SERVICE:

Service shall be provided through a separate meter serving space heating and water heating facilities with no provision for connecting other loads thereto. The customer's dual fuel system controls, circulating fans and pumps and all other alternate fuel related equipment shall be served as firm load. Unless otherwise specified by the Company, the point of delivery and service voltage for this service shall be the same as for the customer's other electric service.

RATE:

Base Rate: \$6.15 per month

Energy Charge: 4.270¢ per Kwh (R)

MINIMUM BILL:

CONTRACT TERMS:

Customer agrees to contract for service under the Special Residential Electric Dual Fuel Space Heating Service rate for a minimum period of one year. At the end of a one year period, the customer will have the option of remaining under the Special Residential Electric Dual Fuel Space Heating Service rate or of returning to the regular Residential Electric Service rate or Optional Time-of-Day Residential Electric Service rate.

SPECIAL TERMS AND CONDITIONS:

1. Electric space heating equipment shall be designed to operate at a nominal voltage of 208, 240, or 277 volts, single phase, shall be (C) separately metered and separately circuited, shall be permanently installed and the electric heating equipment shall be the primary source of space heating.
2. All installations must meet the minimum standards of the National Electrical Code so that the equipment will operate in a satisfactory manner and not interfere with other operations of the Company's system. Architects, contractors and electricians should consult with the Company before proceeding to design or erect installations for heating to make sure their equipment, insulation and building construction will meet requirements and receive adequate service.
3. The customer must provide a load-break switch or circuit breaker equipped with electrical trip and close circuits allowing for remote operation of customer's switch or circuit breaker by Company. The customer must wire the trip and close circuits into a connection point designated by Company to allow installation of control equipment by Company. Customer must provide a continuous 120 volt AC power source at the connection point for operation of the Company's control system.
4. The Company recommends that the installed capacity of electric water heating equipment be sufficient to provide the required volume of hot water giving consideration to the interruptions to be experienced as hereinafter discussed, to permit maximum utilization of the rate for the benefit of the customer. C
5. Natural gas shall not be used in the secondary heating systems of those C customers receiving electric service in those areas where the Company also provides natural gas service.
